PROFESSIONAL SUMMARY

Junior Full-Stack Developer with hands-on experience in React, TypeScript, Node.js, Java, Spring Boot and PostgreSQL. I built Vardão Central, a system used daily by the company where I work, and the company website, on my own initiative and alongside my role as a Sales Representative. My technical sales experience since 2017 strengthens my ability to understand requirements and turn real problems into solutions. I completed the technical course in Systems Development (SENAI) and am pursuing a Bachelor's degree in Computer Science. I am seeking my first developer role: Junior Full-Stack, Junior Front-end, Junior Backend (Java or Node.js) or Junior Software Developer.

TECHNICAL SKILLS

Back-end: Java, Spring Boot, Spring Security, JPA, Node.js, Express, TypeScript and REST APIs.

Front-end: React, TypeScript, JavaScript, HTML5, CSS3 and Tailwind CSS.

Data and architecture: PostgreSQL, MySQL, Prisma, Firebase, Supabase, RabbitMQ, Docker Compose, microservices and WebSockets.

Tools and practices: Git/GitHub, GitHub Actions (CI), automated testing (Vitest, Playwright, JUnit and Testcontainers), Postman, Scrum/Kanban and business-rule modeling.

SELECTED PROJECTS

Vardão Central: store management system — Case study | vardao-central.vercel.app (restricted access)
React, TypeScript, Node.js, Express, PostgreSQL, Prisma, RabbitMQ, Playwright. Built solo, on my own initiative alongside my sales role; private code.

- Used every day at an authorized Husqvarna dealer: counter (exact-code search, exploded view, quotes by PDF and WhatsApp), CRM, finance (income statement, cash flow, working capital) and inventory.
- The finance module replaced the old ERP's, with its rules reproduced and covered by automated tests. The suite has 1,491 back-end tests, 623 front-end tests (Vitest) and 70 end-to-end tests (Playwright), run locally on 10 Nov 2026.

BusinessFlow — flowbusiness.vercel.app | GitHub
React, Node.js, Express, PostgreSQL and Prisma

- Multi-company SaaS for accounting firms: clients, finance with OFX reconciliation, income statement, documents, deadlines, audit trail and a client portal. Per-company data isolation, JWT authentication with refresh tokens and API tests against a real PostgreSQL, with CI. Public demo with fictional data.

Industrial IoT Platform — plataforma-iot-industrial.vercel.app | GitHub
Java, Spring Boot, React, RabbitMQ, WebSockets and Python

- Real-time machine telemetry with simulated sensors: a Java 21 and Spring Boot API, a RabbitMQ queue, a Node gateway and a React dashboard with alerts.
- Automated tests in all four services (including against a real PostgreSQL), CI on GitHub with Docker and security checks, access roles and a documented API.

Vardão Máquinas website — Case study | vardaomaquinas.com.br
Next.js, React, TypeScript and Tailwind CSS. Built on my own initiative for the company where I work; private code.

- Institutional website in production so customers find the store on Google and reach a salesperson: product catalogs, model-specific accessory guides and articles, data-driven pages, search, structured data and contextual WhatsApp.

EDUCATION

Bachelor of Computer Science | Universidade Anhembi Morumbi — *Expected: 10/2028*
Systems Development technician | SENAI — *Completed: 12/2024*

PROFESSIONAL EXPERIENCE

Vardão Máquinas | Sales Representative — *Sep 2020 - present*

- At a family-owned authorized Husqvarna dealer: counter service and technical sales (garden, forestry and family farming), customer guidance, quotes and negotiations, purchasing and inventory control.
- On my own initiative and alongside my sales duties, I built Vardão Central solo, a system used daily in the company's operations, and the company website, vardaomaquinas.com.br.

Yamashita Tratores | Stock and sales assistant, then Sales Representative — *Sep 2017 - Sep 2020*

- Joined in Sep 2017 as a stock and sales assistant and was promoted to Sales Representative in Oct 2017. Handled technical sales of farm machinery and supplier negotiations.

COURSES

Java Programming - SENAI, 120h (2022) | **Database Programming** - SENAI, 120h (2024)
Computer Science, Harvard in Brazil - Fundação Estudar course, 70h (2025) | **Cloud Services Deployment (AWS)** - SENAI, 40h (2022), a course, not an AWS certification
AI-900 - Azure AI Fundamentals - self-paced Fundação Bradesco course, 16h (2025), not a Microsoft certification
