PROFESSIONAL SUMMARY

Junior Full-Stack Developer with skills in Java, Spring Boot, React, Node.js and PostgreSQL. I built Vardão Central, a system used daily by the company where I work, and developed the company's website. My professional experience in technical sales and business operations since 2017 strengthens my ability to understand requirements and turn real problems into solutions. I completed the technical course in Systems Development (SENAI) and am pursuing a Bachelor's degree in Computer Science. I am seeking my first professional opportunity in technology, primarily in software development, while remaining open to other junior IT roles.

TECHNICAL SKILLS

Back-end: Java, Spring Boot, Spring Security, Node.js, Express, TypeScript and REST APIs.

Front-end: React, TypeScript, JavaScript, HTML5, CSS3 and Tailwind CSS.

Data and architecture: PostgreSQL, MySQL, Prisma, Firebase, Supabase, RabbitMQ, Docker, microservices and WebSockets.

Tools and practices: Git/GitHub, Postman, Scrum/Kanban, automated testing (Vitest and Playwright) and business-rule modeling.

SELECTED PROJECTS

Vardão Central: store management system Case study | Live app

React, TypeScript, Node.js, Express, PostgreSQL, Prisma, RabbitMQ, Playwright. Work project built solo, private code.

- Used every day at an authorized Husqvarna dealer: counter (exact-code search, exploded view, quotes by PDF and WhatsApp), CRM, finance (income statement, cash flow, working capital) and inventory.
- The finance module replaced the old ERP's, with its rules reproduced and covered by automated tests. The suite has 1,491 back-end tests, 623 front-end tests (Vitest) and 70 end-to-end tests (Playwright), run locally on 10 Nov 2026.

Vardão Máquinas website Case study | Website

Next.js, React, TypeScript and Tailwind CSS. Work project, private code.

- Institutional website in production so customers find the store on Google and reach a salesperson: product catalogs, model-specific accessory guides and articles, data-driven pages, search, structured data and contextual WhatsApp.

Industrial IoT Platform Live app | GitHub

Java, Spring Boot, React, RabbitMQ, WebSockets and Python

- Real-time machine telemetry: a Java API, a queue, a Node gateway and a React dashboard with alerts.
- Automated tests in all four services (including against a real PostgreSQL), CI on GitHub with Docker and security checks, access roles and a documented API.

BusinessFlow Live app | GitHub

React, Node.js, PostgreSQL and Prisma

- Small-business SaaS with CRM, scheduling, finance, services, reports and indicators.

EDUCATION

Bachelor of Computer Science | Universidade Anhembi Morumbi *Expected: 10/2028*
Systems Development technician | SENAI *Completed: 2024*

PROFESSIONAL EXPERIENCE

Vardão Máquinas | Sales Representative *Sep 2020 - present*

- At a family-owned store, consultative sales of Husqvarna equipment (garden, forestry and family farming) plus purchasing, inventory control, maintenance and finance support.
- Built Vardão Central, which standardizes the store quotes, set up a CRM for customers and leads, built the parts ordering and the company website, vardaomaquinas.com.br.

Yamashita Tratores | Stock and sales assistant, then Sales Representative *Sep 2017 - Sep 2020*

- Joined in Sep 2017 as a stock and sales assistant and was promoted to Sales Representative in Oct 2017. Handled technical sales of farm machinery and supplier negotiations.

COURSES

Java Programming - SENAI, 120h (2022) | **Database Programming** - SENAI, 120h (2024)
Computer Science, Harvard in Brazil - Fundação Estudar, 70h (2025) | **AWS Academy Graduate - AWS Academy Cloud Foundations** - AWS Academy (2022)
AI-900 - Azure AI Fundamentals - Fundação Bradesco, 16h (2025)
